Fresh Fragrance Bonding and Encapsulating Deodorizer and Severe Odor Counteractant

HYDROCIDE Xtreme™ chemically neutralizes odors by binding, bonding, encapsulating, and absorbing odors associated with humans, animals, food, chemical processes and smoke. HYDROCIDE Xtreme contains a fresh 'green' fragrance to leave the treated environment with a refreshed, deodorized smell. Results are best when odor source is treated with HYDROCIDE Xtreme™ and then cleaned. HYDROCIDE Xtreme is an amazing new odor counteractant. It contains an odor neutralizer that binds to and absorbs odors no matter what the source. HYDROCIDE Xtreme effectively eliminates odors from pet urine and feces, vomit, skunk musk, pet or human body odors, and decaying protein and organic matter. It can be used to effectively treat odors on any water safe surface including carpet, draperies, upholstery, pet beds, mattresses, and more. It does a fabulous job of treating general odors in carpeting to help freshen up a total room. Use HYDROCIDE Xtreme with a Water Claw® tool such as a FlashSpotter™, Spot Lifter®, or FlashXtractor™ to treat severe urine contamination.

HYDROCIDE Xtreme can also be added to your pre-spray to treat areas of concern prior to cleaning. HYDROCIDE Xtreme works immediately, making your cleaning job more pleasant.

This amazing chemical does everything its competition does but without that pungent chemical odor that lasts for months and without any re-soiling residue! Instead it uses, a fresh., light, "green approved" fragrance that your customers will love and not have to live with for months!

As a bonus, HYDROCIDE Xtreme contains a polymer in the formula that helps to prevent rapid re-soiling of the treated area. It effectively cleans and treats not only without leaving a sticky residue, it actually does not contribute to prevents re-soiling. It will make your reputation as a professional cleaner even stronger!

- Fresh fragrance bonding, absorbing, and encapsulating deodorizer and severe odor counteractant
- Eliminates odor on contact on carpet, upholstery, mattresses, and porous hard surfaces
- Effective against urine and feces odors, vomit, decay, skunk musk, and so much more
- Contains no oxidizers, enzymes, bacteria, or chemical desensitizers
- Fresh, green approved light fragrance that won't linger in the environment for weeks
- Works great with sub-surface extraction tools like the Water Claw™, Spot Lifter™, FlashXtractor™, and Flash Spotter™

DIRECTIONS:

Test for colorfastness. Always apply enough to assure direct contact with odor source. In some cases this means complete saturation.

As A Severe Odor Counteractant for Urine, Smoke, Vomit, and Feces Mix 1 part solution with 8 - 16 parts water. Saturate spray or flood the treatment area with solution. It is important for the solution to come in direct contact with all of the odor affected surface. Allow to dwell for 5 to 10 minutes, then thoroughly blot or extract solution from treatment area. Any remaining odor is an indication that HYDROCIDE Xtreme™ did not come in direct contact with the odor source

For General Purpose Deodorization and Surface Treatment

Mix 1 part solution with 16 parts water. Spray mixed solution onto treatment area. This solution may also be fogged using a wet fogger such as a ULV fogger. Wear a NIOSH approved organic vapor respirator if fogging

the treatment area. For fogging, area must be vacated of pets and unprotected people.

Upholstery, Mattress, and Pet Bed Treatment

Mix one part solution with 16 parts water. Apply with trigger or hand held pressure sprayer to treatment area. Evenly apply the solution. Allow area to dry before using.

As a Carpet or Upholstery Cleaning Additive

For Presprays: Add up to eight ounces per gallon of ready to use prespray to deal with odors prior to cleaning. Be aware that the addition of HYDROCIDE Xtreme™ may neutralize some fragrances in presprays.

For Extraction Rinse Detergents: Add 1 to 2 ounces of solution to mixed concentrate of cleaning solution

As a Skunk Musk Treatment

Mix one part solution with 8 parts water. Apply the solution thoroughly across the contaminated surface. Thoroughly agitate

and brush the area. Blot up or vacuum away solution. Re-apply treatment solution to area and allow to dry. Do not extract, rinse, or blot up final solution application.

For Decaying or Decomposing Protein or Organic Matter

Remove excess contamination. Mix 1 part solution with 8 parts water. Saturate spray or flood area with treatment solution. Agitate solution into contaminated area with brush. Allow to dwell 5 to 10 minutes. Extract area thoroughly. Re-apply treatment solution and allow to dry.

Special Directions When Using Water Claw Sub-Surface Extraction Tools (FlashSpotter™, Spot Lifter®, or FlashXtractor™)

Saturate the area with HYDROCIDE Xtreme™ and flush area with the Water Claw by adding more water in the process. Follow up with a misting of the area with HYDROCIDE Xtreme™ and/ or Bridgepoint Bio-Modifier or Bio Charge.
